SKILLS

Angular, React
TypeScript, JavaScript
RxJS, NgRx
HTML5, CSS3, SCSS
Tailwind, Bootstrap,
Unit test
REST APIs
Git, Agile

Experience

IBM Solutions Delivery Inc.
(2020–Present)

Prosource Global (2020)

Indra Philippines
(2018–2020)

PCCW Solutions (2016–2018)

Accenture (2016)

PROFESSIONAL SUMMARY

Frontend Developer with 10 years of experience building enterprise-grade applications across airlines, finance, and government sectors. Specializes in scalable UI architecture and JavaScript frameworks – Angular, ReactJS, with strong focus on performance, reusability, and user experience.

KEY PROJECTS

U.S Veterans Insurance (USAA)

Delivered high-performance React-based user interfaces
Designed scalable, reusable UI components
Improved application performance and resolved UX issues
Diagnosed and fixed bugs across the application
Integrated APIs for seamless frontend-backend interaction
Ensured code quality through testing and validation
Maintained CI/CD pipelines for reliable deployments

Property Tax Management (Ryan LLC, Thomson Reuters – One Property Tax)

Built scalable, responsive applications using Angular
Maintained application stability by diagnosing and fixing defects
Collaborated with backend teams to deliver seamless integrations
Ensured code quality through unit testing and validation
Managed version control workflows to support team collaboration

Tax Advisory (Thomson Reuters – Onvio Advisory)

Developed scalable, responsive interfaces with integrated backend data

Ensured application stability through proactive issue resolution

Partnered with backend teams to deliver seamless user experiences

Maintained high code quality through testing and validation

Insurance Suggestion (iSelect)

Design and develop responsive, user-friendly interfaces integrated with backend data to deliver seamless user experiences.

Troubleshoot and resolve software issues to ensure stability and performance.

Collaborate with backend teams to integrate features and maintain consistent functionality.

Write and execute unit tests to ensure reliable, high-quality code.

Airline Online Shopping (AirAsia Ourshop)

Develop and optimize responsive, intuitive interfaces integrated with backend data for smooth user experiences.

Identify, analyze, and resolve software defects to ensure application reliability and performance.

Collaborate with backend teams to implement efficient integrations and maintain system stability.

Develop and run unit tests to validate functionality and maintain clean, reliable code.

Airline Call Center Application (EI AI)

Build and maintain responsive, user-friendly interfaces integrated with backend data for seamless user experiences.

Diagnose and resolve software issues to ensure stable and reliable application performance.

Collaborate with backend developers to implement features and maintain cohesive functionality.

Develop and execute unit tests to ensure code quality, reliability, and maintainability.

Airline Booking Systems (AirAsia, TAP, Royal Air Maroc)

Design, implement, and maintain responsive interfaces integrated with backend data for smooth user experiences.

Troubleshoot and resolve software defects to ensure stable application performance.

Collaborate with backend teams to integrate services and maintain consistent functionality.

Develop and execute unit tests to ensure reliable, high-quality, and maintainable code.

Smart Identity Card System (Smartics2 – Hongkong ID Migration)

Create and maintain responsive, user-centric interfaces integrated with backend data for smooth user experiences.

Identify and resolve software issues to ensure stable and reliable application performance.

Collaborate with backend developers to implement efficient integrations and maintain consistent functionality.

Timesheet Management System

Develop and maintain frontend and backend components using JavaEE to build scalable and efficient web applications.

Identify and resolve software issues to ensure smooth and reliable application performance.

Manage and maintain database structures and records, optimizing queries and ensuring data accuracy and reliability.

EDUCATION

Bachelor of Science Major in Computer Science
Pamantasan ng Lungsod ng Maynila (2016)
